ACOUSTIC POLYESTER CUSTOM DESIGNS

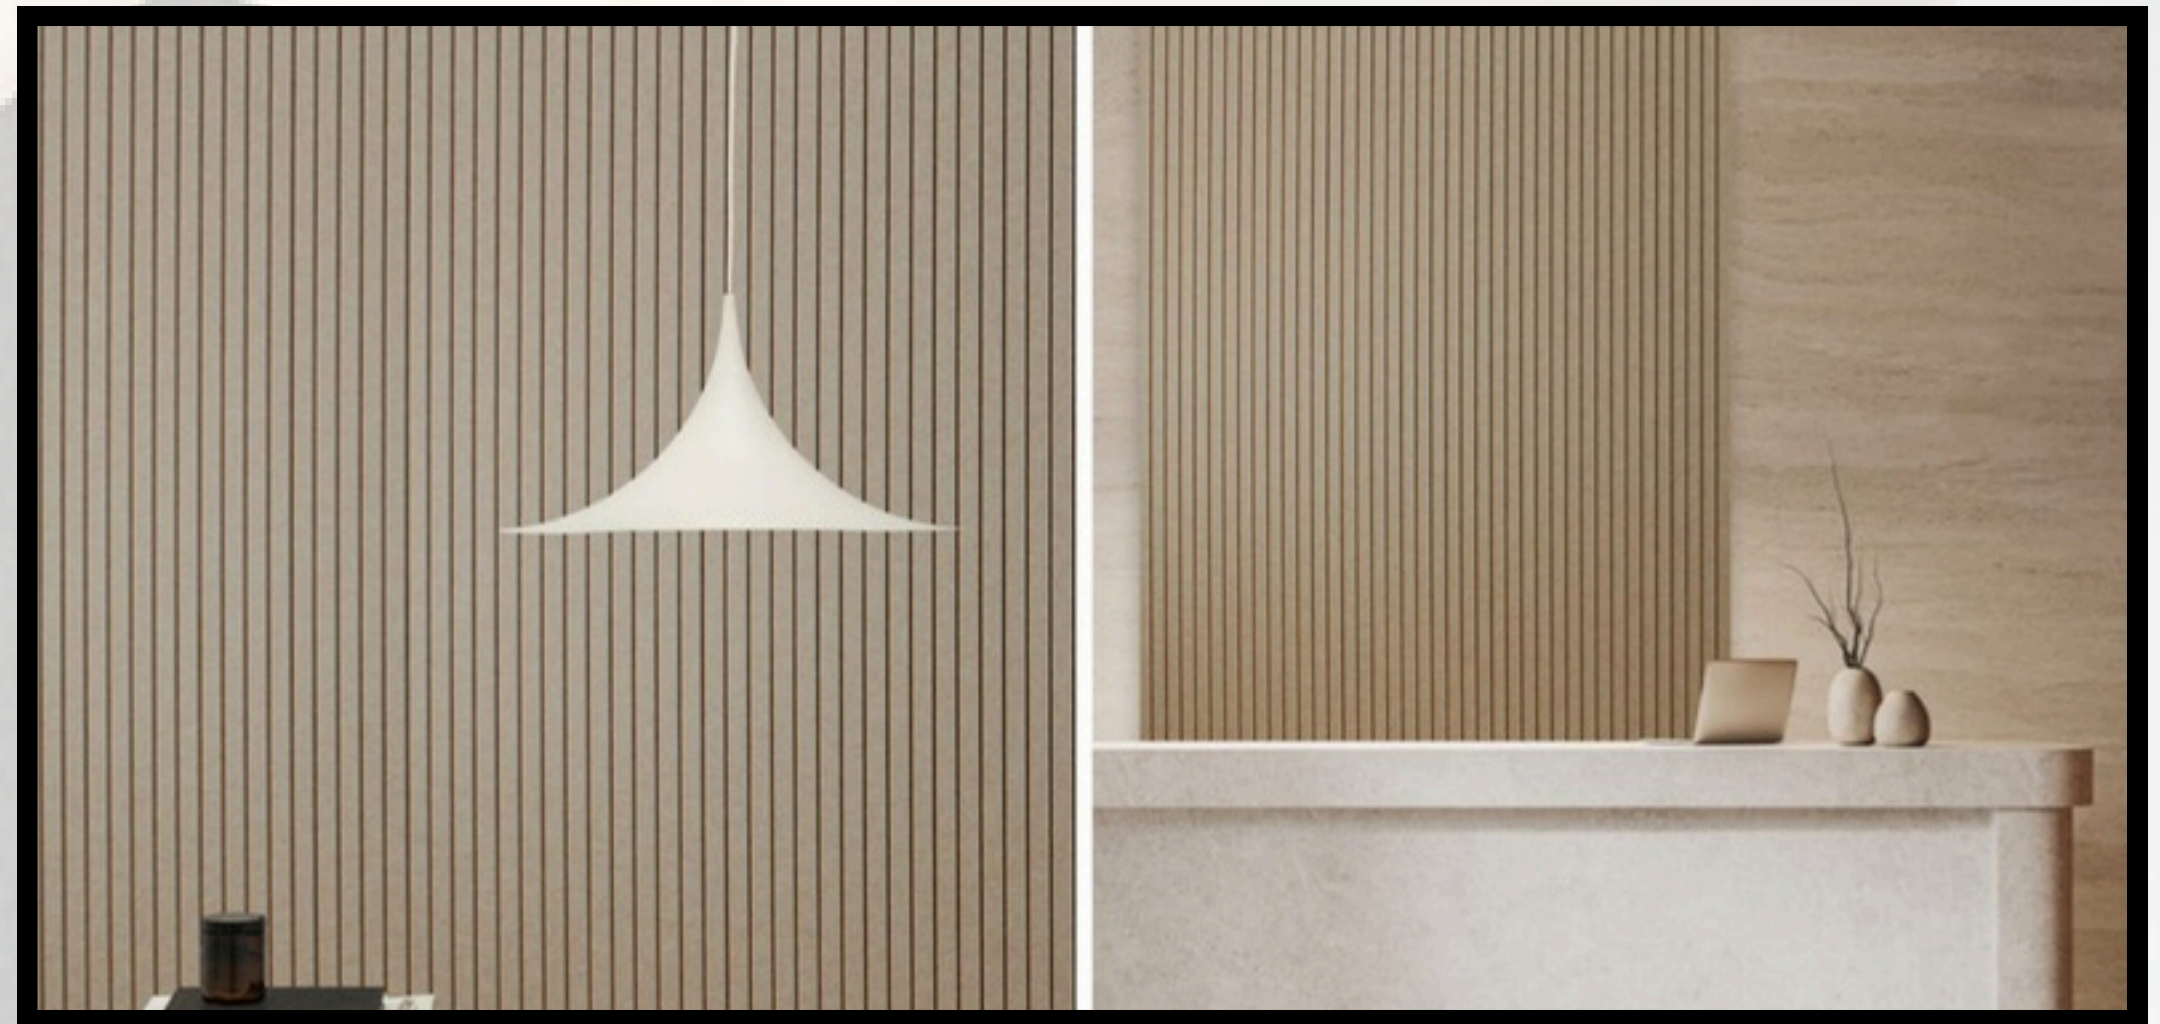

Acoustic tile panels are high-performance sound-absorbing panels designed to enhance sound quality in any space. Made from durable, sound-dampening materials, these panels reduce noise, echoes, and reverberation, creating a more controlled acoustic environment. Ideal for ceilings and walls, acoustic tile panels seamlessly integrate into various settings, such as offices, schools, recording studios, and public areas. Available in various sizes, colors, and finishes, they not only improve acoustics but also contribute to the overall aesthetic of the space.

ACOUSTIC V GROOVE PANEL HORIZONTAL

Acoustic V grooved panels adds a decorative element to the panels, making them visually appealing. The design can vary from simple and subtle patterns to more intricate and complex arrangements, allowing for customization to match the interior design of a space
